ABOUT ME

Analytical and results-driven Economics student with proven skills in data analysis and project management. Seeking to leverage analytical skills and academic background in an internship position at an innovative technology firm.

EXPERIENCE

Python Project – Data Analysis & Predictive Modeling

- Collaborated in a team of 4 to collect, clean, and analyze 3 datasets using Python (Pandas, NumPy), delivering actionable insights that drove informed decision-making.
- Applied machine learning techniques to train and evaluate predictive models using Scikit-learn.
- Visualized data insights through charts and dashboards using Matplotlib and Seaborn.

Statistical Control & Optimization Project - Data optimization

- Applied statistical process control (SPC) techniques to monitor and analyze data quality and variability.
- Optimized model parameters using optimization algorithms to improve accuracy and efficiency by 15%.
- Documented methodology and delivered a comprehensive report with visual data summaries, enabling data-driven decision-making and achieving 5 measurable improvements.

EDUCATION

Bachelor of Economics

Expected graduation: June 2029

National Taiwan University, Taipei, Taiwan

- Relevant Coursework: Introduction to Statistical Control and Optimization, Artificial Intelligence Programming with Python, Calculus

SKILLS

- **Technical Skills:** Proficient in Python, Microsoft Office Suite, SQL and Google Analytics.
- **Soft Skills:** Excellent communication, teamwork, problem-solving abilities, Continuous Learning, Analytical Thinking
- **Languages:**
 - Vietnamese | Native
 - Mandarin | Fluent | HSK 6, TOCFL C1
 - English | Fluent | IELTS 7.5
